Application/Control Number: 10/561,443 Page 2

Art Unit: 3679

#### Election/Restrictions

1. Applicant's election without traverse of Species V shown in Fig. 11 in the reply filed on September 4, 2007 is acknowledged.

2. Claims 3, 4, 7 & 9-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on September 4, 2007.

## Drawings

- 3. The replacement drawings filed September 4, 2007 are objected to because:
  - a. The numeral 3 in Fig. 4 needs to be changed to 3". See page 22, line 11 as amended.
  - b. The numeral 78 in Fig. 11 needs to be changed to 78'. See page 32, lines 12 & 16 as amended.

#### Specification

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Application/Control Number: 10/561,443 Page 3

Art Unit: 3679

## Claim Objections

5. Claims 5 & 6 are objected to because in each the limitation, "to enable to slide axial direction" should be changed to "to enable each to slide in the axial direction".

### Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 8 recites the limitation "the constant velocity joints". There is insufficient antecedent basis for this limitation in the claim since only one such joint is positively recited.

### Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 9. Claims 1, 2, 5, 6 & 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Kayser, US 3,204,429. Fig. 1 shows a vehicle steering system comprising an intermediate shaft system including:

Art Unit: 3679

an input shaft (see "prime mover" in col. 3, line 39) for transmitting a rotation from a steering wheel;

an intermediate shaft including an upper immediate shaft 18, a lower intermediate shaft 12 and a connecting device (see "splined" in col. 3, lines 27 & 29) for connecting the upper intermediate shaft to the lower intermediate shaft in such a manner as to enable each to slide in the axial direction and to transmit a rotation there between;

an output shaft (see "prime mover" in col. 4, lines 15 & 16) for driving a steering mechanism on a vehicle; and

universal joints 14, 16 which provide connections, respectively, between the input shaft and the upper intermediate shaft and between the lower intermediate shaft and the output shaft.

Fig. 1 shows the universal joint 16 is a constant velocity ball universal joint (see also col. 3, lines 40 & 41) and the universal joint 14 is a cross universal joint.

#### Conclusion

- 10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bachman shows a steering system. Burke and Hancock each show a steering system comprising a constant velocity joint.
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Greg Binda whose telephone number is (571) 272-7077. The examiner can normally be reached on M-F 9:30 am to 7:00 pm with alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on (571) 272-7087. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
